Dear Commission Members:

This letter is in regards to the Nebraska Resources Company's proposed construction of a natural gas pipeline. This line will run from Clay County, through York County, up to the city of Columbus. I would like to add my support to this proposed construction.

For rural communities to stay economically viable, we need to make sure new and existing companies have access to reliable and available energy resources. I know of communities who have lost business prospects because the energy necessary to serve the business was not there. With the growing prospect of ethanol and bio-diesel facilities being built, communities need to show a low-cost, reliable source of natural gas.

The information I have received shows the Seminole Energy Services Company which owns NRC to be reputable and dependable. Please support their application for the natural gas pipeline and help keep rural communities cost of gas down and potential economic benefit up.

Sincerely,

A large, stylized handwritten signature in black ink, which appears to read "Greg Adams".

Senator Greg Adams  
District 24
